Single Solar Panel Pole Bracket for Solar Panels up to 170 Watts
INSTALLATION INSTRUCTIONS

PV1X130POLE
At AIMS Power, our mission is to be leaders in the design and development of off-grid and renewable energy.

We sell our signature DC to AC inverters, solar panels, solar mounts, deep-cycle batteries, solar charge controllers and more to some of the most innovative companies and organizations across the US and worldwide. What’s more, we strive to provide the best quality products and unbeatable customer service and tech support to match.

This product is backed by a 10 year warranty and built to withstand the most rugged environments.
## COMPONENTS

</tbody>
</table>
1. Attach pole bracket to upright bracket.
2. Attach support bracket to pole bracket and upright bracket. When attaching the support bracket to the upright bracket, you can choose the optimal angle by using the predrilled slots.

3. Secure to pole using hose brackets.
4. Place the solar panel horizontally on the upright bracket and attach using bolts (panel should have pre-drilled holes on the back).

5. Ensure all attachments are secure.

Pole not included. Confirm existing pole can support the weight of the panel.
